

Art-Line

Breathtakingly attractive

Art-line

To be precise.

Absolutely Brilliant –

Temperature control was never so good!

16 unique decors for individualists

Thermostatic heads with a completely new look – the unique Art-Line from HEIMEIER makes it possible.

With the help of a novel, high-quality printing process, breathtakingly attractive views of the radiator which lend an artistic accent to the living area can now be realised – great news for individualists who really appreciate something special.

The Art-Line starts off with 16 different decors. From “brushed ruby” to “amber”, there’s something for every taste.

These 16 styles are available with the Art-Line for the DX and VDX heads, valve covers (thermostatic valve bodies, lockshield valves, Multilux) as well as for various Multibox editions.

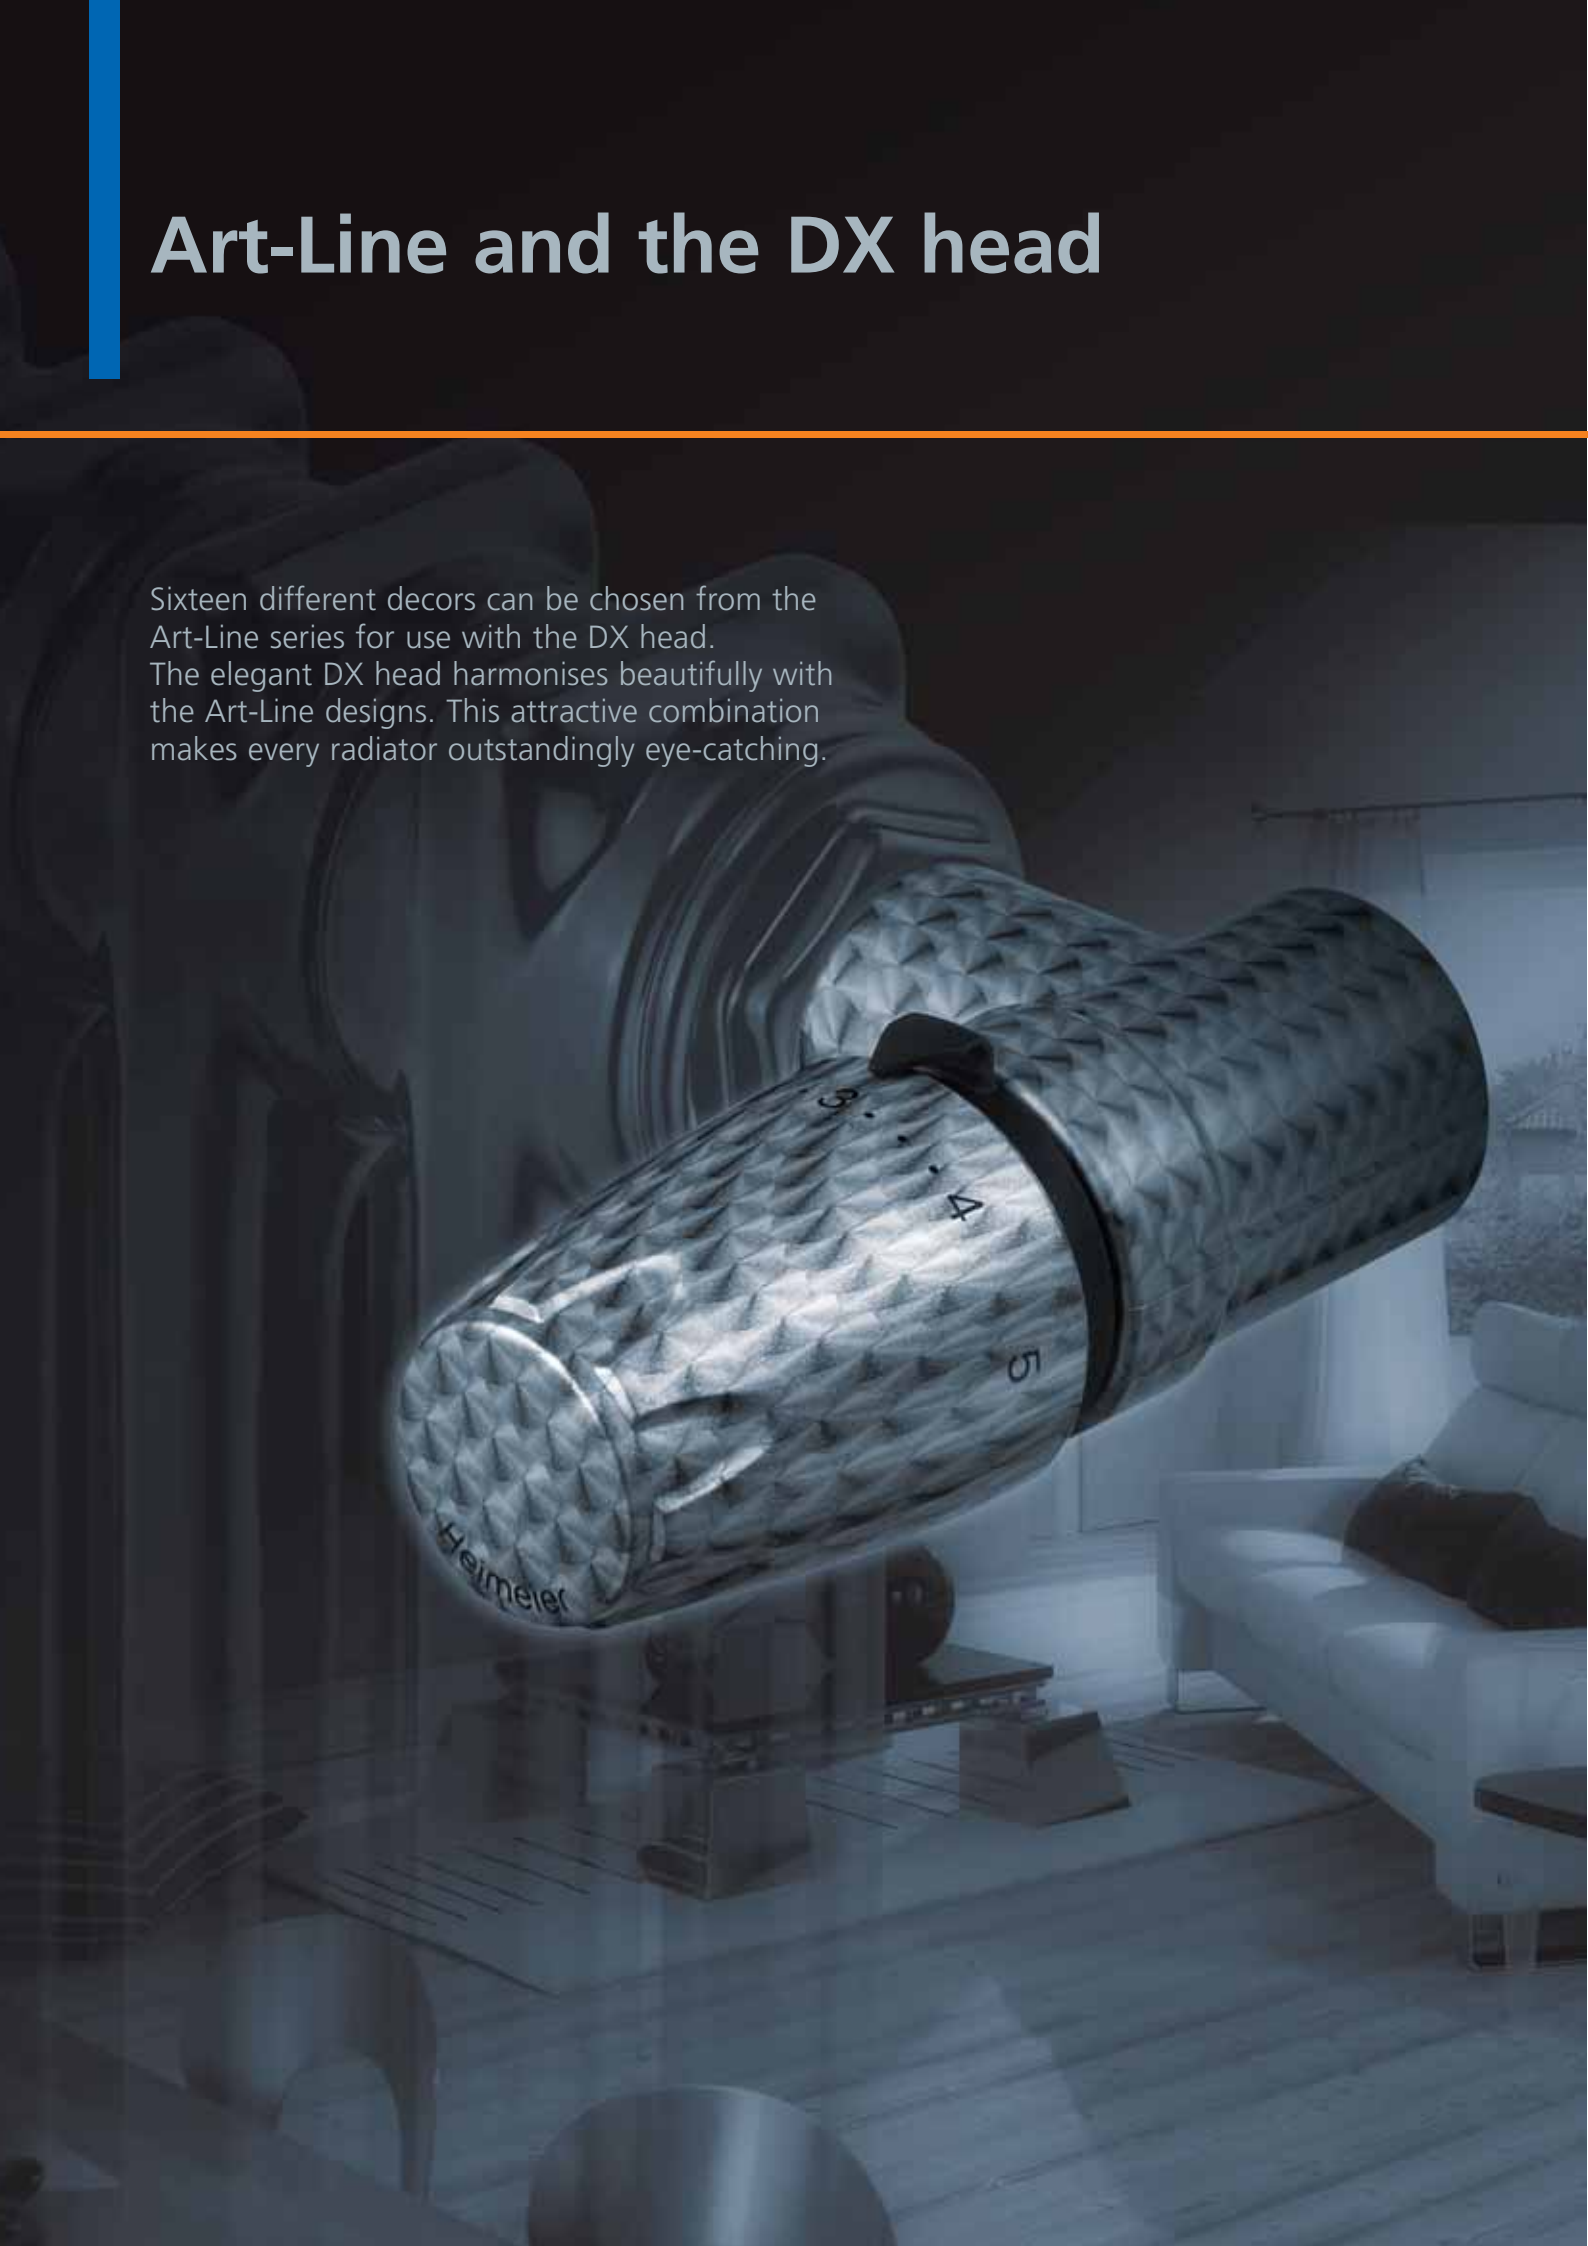

Art-Line! Temperature control has never been so appealing.

Art-Line and the DX head

Sixteen different decors can be chosen from the Art-Line series for use with the DX head. The elegant DX head harmonises beautifully with the Art-Line designs. This attractive combination makes every radiator outstandingly eye-catching.

Art-Line and the VDX head

With the VDX head the Art-Line decors come into their own even more as both the head and the connection cover can be offered in the preferred Art-Line design. All 16 current decor solutions can be selected for use with the VDX head.

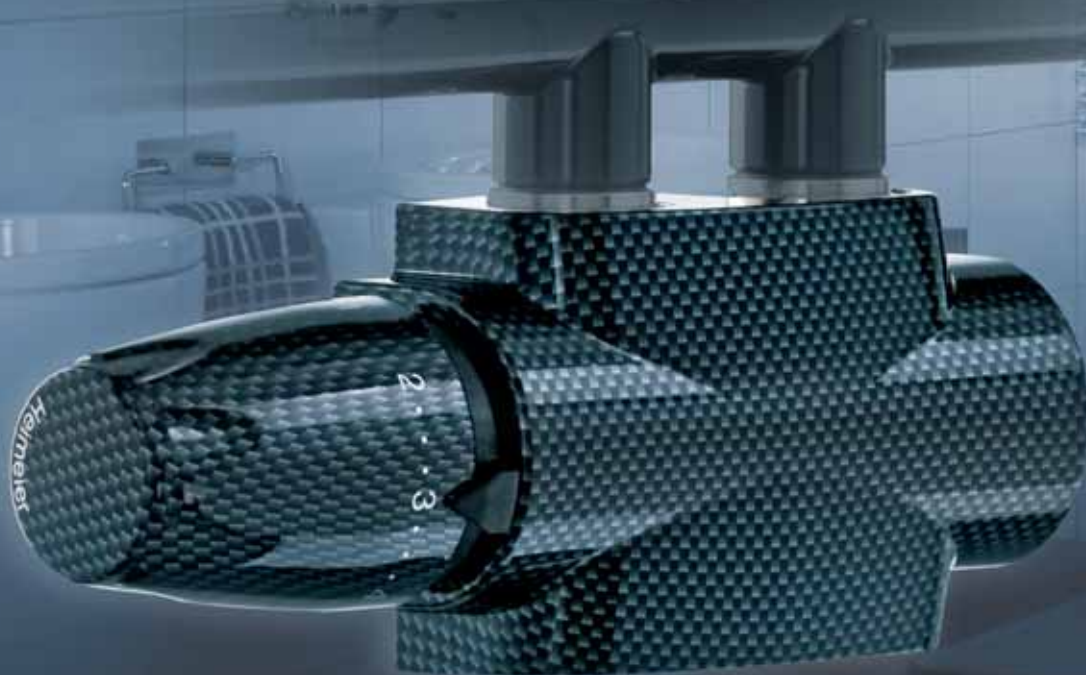

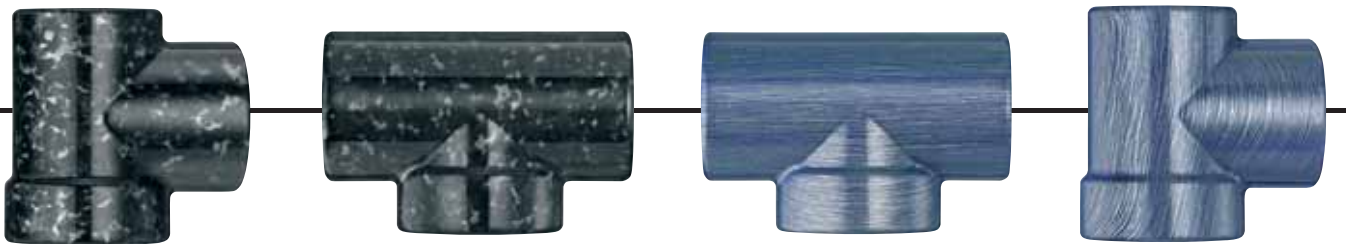

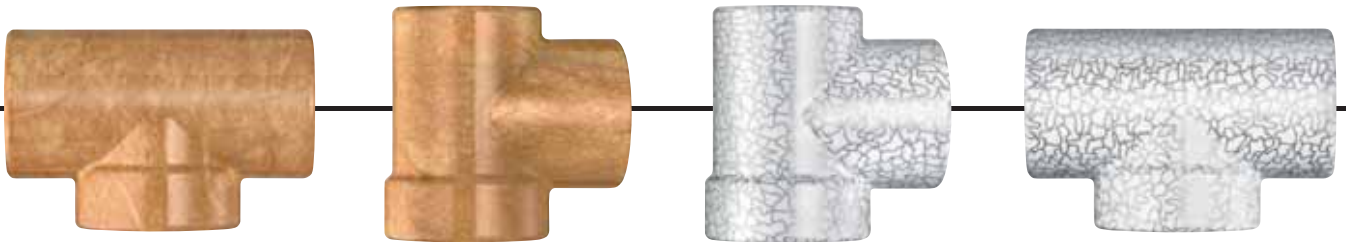

Art-Line and covers

The DX head should always be offered together with the respective covers for thermostatic valve bodies and lockshield valves so that the Art-Line is brought to bear perfectly. With 16 decors to choose from, there is always an individual solution available, offering something special for every taste.

The cover is available for angle and straight connections.

Even the Multilux cover for design and bathroom radiators, with the low-positioned two-point connection system, is available in Art-Line decor. This combination is always an effective means to an optically attractive solution.

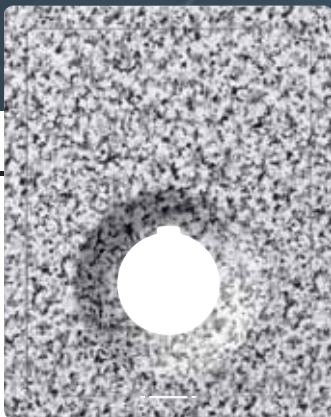

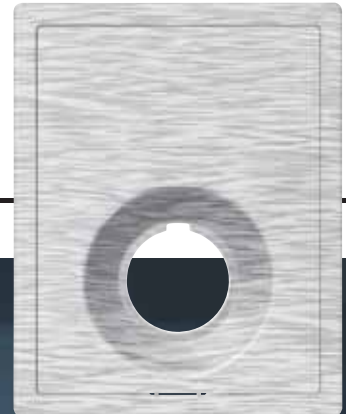

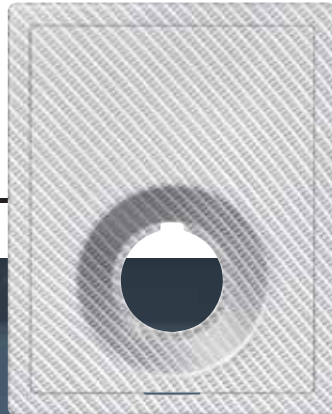

Art-Line and Multibox

The Art-Line is also available in all of its sixteen decor variations for the Multibox products RTL and K-RTL. Cover plate and head create a particularly attractive scene with this new design assortment – it's unique in this form.

Art-Line decors in overview
